The diagram illustrates a vertical bottle handling process. At the top, a **吸尘机** (vacuum cleaner) is connected to a central unit. A horizontal conveyor belt moves from left to right, indicated by an arrow labeled **运行方向**. On the left side of the conveyor, there is a **空瓶理瓶机** (empty bottle sorting machine) with a circular component labeled $\varnothing 1180$. Two workers are shown at the bottom, each operating a circular component also labeled $\varnothing 1180$. To the right of the conveyor, a vertical stack of components is shown, with an arrow labeled **运行方向** pointing downwards, indicating the flow of bottles through the system.
